**Subject:** Dimock resampling

Rich, just so you know the Dimock resampling proposal I just sent to HQ is your plan with a couple of edits/formatting changes plus an identification of the specific parameter that was triggered, thus warranting the resampling. There are no changes to basic content. I made these changes to help address questions I was getting yesterday when I briefed Mathy and others on the conf call. Any questions, just let me know. Thanks, den.
